

## **New Features**

### **Calendar**

-Users can now print out tasks and events using the **Print** button in the task or event window.

### **Customer Order Form**

-New option to exclude prices from Customer Order Forms by checking the **Exclude Prices** box. This feature is also available when printing from the **Customer Order Pad**.

### **Critical Inventory Inquiry**

-Now automatically enters the primary vendor when the user selects to go to the Projected P/O screen.

### **Inventory Dashboard**

-New access level (File > Access Levels > File tab) allows administrators to restrict access to the dashboard. The Inventory Dashboard requires the Business Intelligence database in order to run.

### **Product Import**

-Users can now specify the Unit of Measure to apply to the imported products.

### **Sales Order**

-The Inform remote version can now run without signature capture.  
-Contract field under the Other tab now reads Price Contract.

### **Salesperson Dashboard**

-New access level (File > Access Levels > File tab) allows administrators to restrict access to the dashboard.

## **Miscellaneous Corrections and Adjustments**

### **Accounts Payable Invoice Entry**

-Corrected issue that caused Internal Notes to pop up again when closed.  
-Fixed issue that enabled attachments when the screen was blank.

### **Advanced Report Writer**

-Fixed error message about missing DLLs when trying to open screen.

### **Invoicing**

-Fixed issue with some large print jobs causing Inform to hang.

### **Pricing Price Matrix**

-Fixed problem saving Future Price Matrices.

### **Sales Order**

-Fixed issue with error message when attempting to scan documents.

### **Vendor Rebate Report**

-Corrected issue that prevented Sales Orders from showing up on the report.
